

Release Notes

7800X Series

2.32d

New features & Enhancements

1. VPN (VPN models only)

- 1-1 Add MTU setting on IPSec configuration
- 1-2 Add exception group for L2TP and PPTP server

2. 3G

- 2-1 Add support for HUAWEI E392/E1552/E5776 dongles

3. Security

- 3-1 Add "Drop" & "Forward" actions of time schedule on time restriction feature.

Note: "Drop" will always drop MAC entries, "Forward" is the reverse and will always forward them.

4. NAT

- 4-1 "Edit" action support on port trigger setting
- 4-2 Avoid nat table full which will cause system be locked up

5. DNS

- 5-1 Add "freedns" to ddns server list
- 5-2 Add keep-alive mechanism for DDNS

Note: "Period" refers to the update period and can be set based on Day/Hour/Minute

6. Management

- 6-1 Add support for http port change
- 6-2 Add WAN MAC display for TR069

7. LAN

- 7-1 Add support for VRRP router redundancy protocol

8. Wireless

- 8-1 Add wireless MAC address list on Wireless MAC Filter
