

The Billion Family is Growing

We are pleased to announce the addition of four new products to the popular Billion range.

The **7800X**, **7800DX**, **7800NX** and **7800DXL** are now available and promise the same unrivalled features and high-level performance you've come to expect from the 7800 series. All new models are NBN fibre ready and include Triple WAN ADSL plus a USB port, allowing the devices to act as a print server as well as a NAS (Network Attached Storage) device with DLNA (Digital Living Network Alliance) and FTP (File Transfer Protocol) access. The USB port can also host a 3G/4G LTE modem connecting to the 3G/4G LTE network for Internet access.

For an in-depth feature comparison of these exciting new models, head to www.billion.com.au.
